

Installation Checklist

More Information and Installation Videos Available online at CabKits.com

- Identify the correct make, model, and serial number for your tractor
- pay attention to serial breaks, as some parts are specific to models *before* or *after* a specific serial number
- Locate your part at TractorInteriors.com by selecting your tractor brand and then choosing your specific model # - this will show all parts available for your model (call **641-390-0321** if you cannot find your part - not every part is listed online)
- Use our 1-Minute quiz to help decide between [Glue-In or Kwik Fit styles](#)
- Choose product options - pay attention to features of your cab - double check if desired part is a match to your cab (e.g. # of speaker grills, color, or type of fabric)
- Review our [Recommended Tools](#) list
- [Remove your old upholstery](#) and clean your cab
- Decide if you are going to [remove your seat](#)
- [Review our Installation Videos](#) for some best practices and pro tips on installation
- Install Your Cab Kit
- Replace any parts you have removed like windows, seals, monitors, or your seat
- Enjoy your new cab!

Please [contact us](#) at any time with questions or more information.
